# Driving the Electric Revolution Undergraduate Award

Connect with students from leading UK universities, who have an interest in Power Electronics, Machines and Drives (PEMD)

A collaboration between UK Research and Innovation (UKRI) and the UKESF to promote PEMD among undergraduate engineers in the Electronics sector in the UK

© iStock-Royce

- Allowing companies working on PEMD technology to connect with the most capable students from the UK's leading universities.
- Leveraging the UKESF's relationship with universities and expertise in managing undergraduate schemes.
- Financial support (a bursary of £1,000) per student is provided by UKRI.
- A low-cost and low-risk way of connecting with dedicated students interested in PEMD at the start of their studies.

To find out more about offering a PEMD-focused Electronics undergraduate a summer work placement, please email [info@ukesf.org](mailto:info@ukesf.org) or visit [ukesf.org/employers/der-undergraduate-award](http://ukesf.org/employers/der-undergraduate-award)
