

UK Electronics
Skills Foundation

Get Connected with Electronics

"I love working in such an exciting and innovative industry where I am able to apply both my creativity and technical knowhow in a very rewarding role."

Max, UKESF scholar

With the **UKESF**, you can turn your interest in Electronics into a worthwhile career

In the UK, the Electronics sector is big, valuable and growing; however, the demand for employable graduates is currently outstripping supply. The UKESF operates collaboratively with major companies, leading universities and other organisations to tackle this skills shortage.

We aim to ensure that all young people are aware of Electronics, as well as the range of exciting options that are out there for studying and working in the sector. We provide Electronics-focused practical activities for students at school and as part of regional event days. At university, we support undergraduates and help prepare them for the workplace through our Scholarship Scheme.

Why study Electronics?

Create the future ∞ Great career prospects ∞ High starting salary ∞ Opportunities to travel

To find out more about Electronics and how to get involved with UKESF activities, visit **www.ukesf.org**

"It's not all complicated Maths and fiddly circuitry."
Louisa, UKESF Scholar
